

# BEST VPN FOR NETFLIX

Netflix is famous in many countries because it is a very good streaming platform and has 40+ plus movies in its streaming platform library. Netflix is available in 190 countries, but if Netflix is still not available in your country, or your country is listed below then you need to use a VPN. Because Netflix is such a popular streaming platform many VPN services providers made sure that their services can unblock Netflix.

This is the list of countries where Netflix is not available:

- China
- Crimea
- North Korea
- Syria

## TOP 5 VPN FOR NETFLIX

### 1. [ExpressVPN - \\$6.67/mo](#)

#### Pros

- Unblocks Netflix
- Fastest Internet Speed
- Special app for Amazon Fire TV Stick
- MediaStreamer Technology works on Apple TV
- 24/7 live chat support
- Loads of privacy extras

#### Cons

- Shorter plans are expensive

## Summary

ExpressVPN is the best VPN service provider if you are going to use it for streaming platforms, torrenting, and accessing restricted content on the web. You can watch Netflix wherever you are in the world as long as VPN is allowed in that country. In all of the VPN services ExpressVPN is considered to be the fastest VPN service provider in all devices, whether you are using Windows or iOS, Linux, Android, BlackBerry, Routers, Raspberry Pi, Chrome, Firefox, Safari, PlayStation, Xbox, Apple TV, Nintendo Switch, Amazon Fire TV, Samsung Smart TV, Roku, Chromecast, and Nvidia Shield.

When you are going to use ExpressVPN all of your information is secure, they have AES 256-bit encryption and OpenVPN protocol. ExpressVPN offers a DNS/IPv6 leak protection and an automatic kill switch. It has a SmartLocation feature that connects you to the best server based on your location. This means you do not need to connect to servers manually and choose the best one that works for you. They have the fastest internet speeds of all VPNs available including the VPNs in this list. They also have 24/7 customer support via live chat. That means you can solve all the problems that you will encounter in their VPN service. If you are unsure whether you should buy ExpressVPN or not then you can always take advantage of their 30-day money-back guarantee to test and try ExpressVPN for yourself before committing and buying their VPN service.

## 2. [CyberGhost - \\$2.75/mo](#)

### Pros

- Unblocks Netflix
- Fast Internet Speeds
- Specialized Servers for Streaming
- Custom Firestick app
- Strict no-logs policy
- Live Chat available 24/7

### Cons

- No P2P or Kodi on Firestick

## Summary

CyberGhost is considered to be one of the best VPN service providers for beginners. It unblocks not only Netflix but also, BBC iPlayer, DAZN, HBO GO, Amazon Prime Video, Sky Go and it is also available in devices like iOS, Windows, Linux,

Android, Routers, Raspberry Pi and websites like Chrome. You can access all of the streaming platforms above whether your country is blocked or not at a cheap price.

CyberGhost has optimized servers for streaming and P2P connections. It also has a single-click *Best Location* feature where it chooses the best server based on your location. It also includes a built-in ad blocker that can filter out all of the ads and potential malware that can infiltrate your system. If you know a lot about VPN service providers then you can customize your own VPN settings in the Smart Rules menu.

Their security offers firm 256-bit encryption which means all of the data sent out of your computer will be encrypted and hard for hackers to decrypt. Not only that, but it also has an automatic kill switch feature and DNS/IPv6 leak protection.

Cyberghost is also compatible with other devices, not only can you use CyberGhost with Windows devices but also on iOS, Linux, Android, Routers, Raspberry Pi, and websites like Chrome. That means you can pretty much connect to almost every device that you currently have right now. Their VPN service provider also has strict no-logs or “zero-logs” policy which means, every time you turn off your VPN service provider then all of the browsing data that you have will be completely wiped and deleted. Their 24/7 customer service via live chat will ensure that your problems with the VPN service provider will be fixed in no time. If you are uncertain between choosing if you would buy their VPN service or not then you can try out their 45-day money-back guarantee if you have difficulties in choosing to buy their VPN.

### 3. PrivateVPN - \$1.89/mo

#### Pros:

- Unblocks Netflix
- Excellent Download Speeds
- Special Servers for Streaming
- Custom app for Amazon Fire TV
- Strict zero-logs policy
- Live chat support

#### Cons:

- Small number of individual servers
- Live chat not always available

## Summary

If you just want to stream Netflix in this VPN service provider then this might be good for you, if you're on a budget then this can be a good option for you. It also works in different streaming platforms like Hulu, HBO, Hotstar, Amazon Prime Video, and BBC iPlayer. These are the streaming platforms that are guaranteed to work when you use PrivateVPN. Their security offers 256-bit encryption, OpenVPN, and DNS/IPv6 leak protection. This means that their security offers high-end security. Your information will not be easy to crack which makes browsing safe. You can definitely rely on their security because they have 256-bit encryption which means data sent out of your device is encrypted.

Despite the fact that the VPN service provider PrivateVPN is a good VPN you can also access different Netflix libraries in countries like US, UK, Canada, France, Japan, Germany, Denmark, Finland, Norway, Sweden, Switzerland, Netherlands, Italy, Spain, Australia, Brazil, Colombia, Argentina, and South Korea. You can have access to these Netflix libraries if you are using PrivateVPN. They also include their own Stealth mode which means they can bypass tough VPN blocks and deep packet inspection. Their chat support may not be 24/7 but it is still a good performing VPN service provider.

## 4. [NordVPN - \\$4.49/mo](#)

### Pros

- Easy access to 7 Netflix libraries
- Excellent High Internet speeds
- Completely no-logs policy
- Simple setup on all devices
- 24/7 live chat support

### Cons:

- No access to Netflix using the Firestick app

## Summary

NordVPN is widely known for its balanced distribution of high-quality features. It has great security. It has fast internet speeds. NordVPN has OpenVPN protocols available in their services, they also have an automatic kill switch, DNS/IPv6 leak protection, and a built-in ad & malware blocker which can filter out dangerous files from coming into your system. Their level of security has 256-bit encryption which means all of the data is encrypted when you are going to browse around the internet and

accessing restricted websites. Their security is so high that they even have a “Double VPN” feature that can add an extra layer of security.

If you plan on using NordVPN on different devices then look no further because here is the list of devices that NordVPN can have access to, devices like iOS, Windows, Linux, Android, BlackBerry, Routers, Raspberry Pi, Android TV, and websites like Chrome and Firefox. If you wish to use NordVPN not only on Netflix but also in other streaming platforms then look no further because NordVPN can also access sites like Hulu, BBC iPlayer, HBO GO, Amazon Prime Video, Showtime, and Sling TV. It can stream in these streaming platforms in high definition quality and 4K-ready. You can try NordVPN with a 30-day money-back guarantee so that you can try NordVPN for free and decide for yourself if you want to proceed with buying NordVPN or not.

## 5. [SurfShark - \\$1.99/mo](#)

### Pros:

- Quick access to 14 Netflix libraries
- Fast VPN speeds on nearby servers
- No-logs policy
- Sleek custom VPN app for Amazon Fire TV Stick
- Easy setup on a range of devices
- 24/7 live chat support

### Cons:

- Top speeds lag behind other VPN

## Summary

SurfShark is a budget-friendly VPN service provider, you can use 1 account on many different devices. You can have one account for your whole family and it will be perfect for securing your whole family's data with one account. Not only can it stream Netflix but it can also stream Hulu, BBC iPlayer, HBO GO, Amazon Prime Video, ESPN on different devices.

SurfShark also has 256-bit encryption and it also has the IKEv2 protocol to protect your data in devices. It offers features like an automatic kill switch, DNS leak protection, and it doesn't store your data which means all your data is safe and secure. It even has its own built-in security mode, CleanWeb, block ads, trackers, malware, and phishing attempts. This means you are always secured when you browse on the web, all of your information is protected. SurfShark can also access 13 different Netflix libraries in countries like the UK, Canada, Japan, France, Germany, Netherlands, India, South Korea, Italy, Australia, Turkey, Brazil, and Singapore. SurfShark also has a no-logs policy which means if you are going to use this VPN service provider your information will be safe, all your browser cache and your browsing data will be completely wiped out and deleted off of your computer. Although you can stream many Netflix libraries and it is budget-friendly the speeds of SurfShark are not that fast.

1. **For PC and Mac**  
Go to the website of your VPN service provider and launch the Netflix website or application.
2. **For Smartphones**  
Download your VPN service provider. Open the app and turn on its VPN. Once it is on, open Netflix and enjoy streaming.
3. **For Amazon Fire TV Stick**  
ExpressVPN, IPVanish, or PrivateVPN will be your best choices to watch Netflix. Because they have a custom app for your device. Download the VPN and run the app. Once the VPN is turned on, launch Netflix then you should be good to go.
4. **For Games Consoles**  
You can change the VPN settings and use your router to mask your IP address. However, if you have ExpressVPN you can use their MediaStremmer technology and use your gaming consoles or other outdated smart TVs to stream Netflix on.

## How to Watch Studio Ghibli on Netflix in the US

After 34 years, the Studio Ghibli movies, directed by Hayao Miyazaki, are finally available on Netflix. But it is not available in the US, Canada, Mexico, and Japan.

**How do you watch Studio Ghibli Movies on Netflix in the US?** Just follow these instructions.

1. **Use a VPN**  
You can simply use one of the VPN service providers above and choose the optimal server for your location so that you can enjoy streaming in high-quality.
2. **What Is the Best VPN Server Location to Unblock Studio Ghibli?**  
It depends on where you live. Countries that are near you that can unblock Studio Ghibli are the best servers if you want to watch their movies in high-definition.
3. **When Are the Studio Ghibli Movies Released on Netflix?**  
All of the Studio Ghibli films are available now on Netflix. These include:
  - Castle in the Sky
  - My Neighbor Totoro
  - Kiki's Delivery Service
  - Howl's Moving Castle
  - Spirited Away
4. **Can I Watch Studio Ghibli Movies in the US Without a VPN?**  
Yes. If you are patient and still have money left then you can still watch Studio Ghibli Movies when HBO Max releases on May 27. You can either choose to wait and pay or to buy a VPN service provider and watch it right now.

## VPNs that don't work with Netflix

Put simply, the majority of VPN services don't provide reliable access to Netflix.

These include:

- TunnelBear
- AirVPN
- TorGuard
- TrustZone
- Avira Phantom
- Perfect Privacy

This is by no means an exhaustive list, either. The five VPN services we recommend are by far the most reliable for streaming Netflix – others may work temporarily but are usually blocked within a week or two.

Avoid free VPN services altogether if you're hoping to access Netflix, too. Bypassing the regularly-changing VPN blocks costs a lot of money, and just isn't something you can expect from a free VPN. The best choices of VPNs are the ones above.

## Can I watch Netflix abroad?

You can use Netflix in pretty much any country in the world, so no matter where you live or are planning on traveling to, you should be able to stream your favorite TV series and movies no problem. But if you live in these countries then Netflix will not be available:

- China
- Crimea
- North Korea
- Syria

## **Is it illegal to Use Netflix with a VPN?**

No, you are free to use VPN when streaming Netflix. But, if you're going to use VPN to access content that is not available in your country is against their terms of service. This means if Netflix finds out that you're using a VPN service provider then Netflix will block your connection.

## **Do I need a VPN to watch Netflix?**

If you live in countries that are geo-blocked by Netflix then you need to use VPNs. If your country is available on the list of countries that have access to Netflix, then that's good, but you will be restricted with content that is only available in your country. For example, if you live in New Zealand you're only getting a small amount of movies and TV shows available in the US library. Choosing the right VPN service will let you connect in any part of the world in just one click.

## **How Can I Watch Netflix on Blocked WiFi?**

There are chances where you will connect to a friend's Wi-Fi or a public Wi-Fi where Netflix is blocked, there is a solution to that, you can just watch Netflix with a VPN. Watching Netflix on blocked WiFi is as easy as downloading a VPN that works with the service, connecting to a server, and watching it through that. Don't be put off if you see a Netflix proxy error when you first try to connect – clearing your cookies and cache should normally solve this problem. If you're still unable to access Netflix, simply select a different VPN server location until you find one that works. Alternatively, reach out to your VPN's customer support because they are the ones best at handling situations.

## **What's the Free VPN That is for Netflix?**

It is not recommended to use free VPNs because your online presence and information is not private. Some "Free" VPNs can be monitoring you if you use their services. The problem with free VPN services is that they very rarely work for Netflix due to limited server locations and stingy data caps. Some free VPNs are also so slow that you'd struggle to stream any content from Netflix, let alone in good quality.

You can just make accounts again and again and make use of their premium services for free including:

- ExpressVPN
- NordVPN
- IPVanish

## Netflix Proxy Error

When you use a VPN service provider not in this list to stream Netflix, it's all too common to see the fearful Netflix Proxy Error message. If you're using one of our five VPN recommendations, which is not likely to happen, this is usually easily solved by clearing your browsing history and cookies, then relaunching Netflix. Alternatively, simply connect to a different VPN server location.

## What's the Netflix VPN Ban?

In January 2016, Netflix began blocking VPN, proxy and Smart DNS services.

Netflix started banning VPNs as Netflix subscribers were using VPN and proxy services to unblock geo-restricted video libraries. That is why only a few VPN service providers are qualified to bypassing their bans

As a result, Netflix gave in to pressure from large copyright holders, who profit from content geo-restrictions as these allow them to sell their content in different locations around the world. But even if Netflix has a ban there are always people that can bypass the bans. The list above is the best one so far and you should use them in streaming Netflix.

## How Does Netflix Know That I am Using VPN?

Once Netflix figures out that you're using a VPN service provider then the IP address will be blocked. Nobody knows how Netflix figures out if you're using a VPN or not, but there are a number of behaviors that will set these IPs apart from genuine ones, such as a large stream of the number of accounts trying to stream from a single IP.

Netflix can ban a whole block of IPs located at the same server or operated by the same company. However, if Netflix blocks the IP there are still more servers to choose from in some VPN service providers.
